Abstract

© 2015, Mediterranean Center of Social and Educational Research. All rights reserved. Modern conditions of managing are characterized by the deep level of integration of national economic systems. Special relevance to the considered processes of adaptation of regional economic systems to “external” impulses is given by the introduction in 2012 to Russia in the WTO and accumulation in recent months of intensity in the relations of the Russian Federation with a certain part of the world community. In work the task of approbation of the methodical principles of taking note of external “impulses” on an index of business activity of the region (IDA) on the example of two regions of the Volga Federal District is set: Republic of Tatarstan and Ulyanovsk region.
